Human anti-NY-ESO-1 T cell receptor (5B8), pCDTCR1
Cat. No.: TCR-L234

This product is for research use only and is not intended for diagnostic use.

DESCRIPTION

Target: NY-ESO-1
Target Species: Human
Epitope: SLLMWITQCFLPVF
Format: Non-modified
HLA: HLA-DRB1*04
Targeting Diseases: Melanoma, breast cancer, lung cancer, prostate cancer, thyroid cancer, ovarian cancer, or synovial cell sarcoma.
Vector Name: pCDTCR1
Vector Length: ~8kb
Vector Type: Lentiviral
Antibody Clone: 5B8
Antibody Host: Human

BACKGROUND

Official Symbol: CTAG1B
Gene ID: 1485
UniProt ID: P78358
Introduction: NY-ESO-1 is a human tumor antigen of the cancer/testis family. It is highly expressed in many poor-prognosis melanomas.
