

Product Information

Yeast Specific Glucose

Cat. No.: **HN-1124-TT3**

This product is for research use only and is not intended for diagnostic use.

Product Overview

D-anhydrous glucose is an important monosaccharide. Glucose is an essential energy source in the physiological processes of living cells. It can be used as a precursor for glycoproteins, glycolipids, and glycosaminoglycans. Glucose is a key component that helps mammalian cells grow and survive under in vitro conditions, and is crucial for cell yield and quality.

Applications

Yeast cultivation

Size

500g

Storage

RT

Recommended dosage

1.3g/L
