

Product Information

Recombinant Anti-Human muc1 Antibody

Cat. No.: **MOM-18065**

This product is for research use only and is not intended for diagnostic use.

Product Overview

Recombinant Mouse Antibody is against Human MUC1, expressed in Chinese Hamster Ovary cells(CHO)

Antigen Description

The alpha subunit has cell adhesive properties. Can act both as an adhesion and an anti-adhesion protein. May provide a protective layer on epithelial cells against bacterial and enzyme attack. The beta subunit contains a C-terminal domain which is involved in cell signaling, through phosphorylations and protein-protein interactions. Modulates signaling in ERK, SRC and NF-kappa-B pathways. In activated T-cells, influences directly or indirectly the Ras/MAPK pathway. Promotes tumor progression. Regulates TP53-mediated transcription and determines cell fate in the genotoxic stress response. Binds, together with KLF4, the PE21 promoter element of TP53 and represses TP53 activity.

Specific Activity

Tested positive against native antigen.

Target

MUC1

Immunogen

The details of the immunogen for this antibody are not available.

Source

Mouse

Species Reactivity

Human

Type

Mouse IgG

Expression Host

CHO

Predicted N terminal

H Chain: QVQLVQS; L Chain: DIQMTQS

Purity

>95%, by SDS-PAGE with silver staining, under reducing conditions.

Applications

Suitable for use in WB, IF, IP, Neut, FuncS, ELISA, FC and most other immunological methods.

Storage

Store at 4°C for up to 3 months. For longer term storage aliquot into small volumes and store at -20°C.

ANTIGEN GENE INFORMATION

Gene Name

[MUC1 mucin 1, cell surface associated \[Homo sapiens \]](#)

Official Symbol

MUC1
