

Product Information

Recombinant Anti-Human ITGAV Antibody

Cat. No.: **MOM-18076**

This product is for research use only and is not intended for diagnostic use.

Product Overview

Recombinant Human Antibody is bind to Human CD51, expressed in Chinese Hamster Ovary cells(CHO)

Antigen Description

The alpha-V integrins are receptors for vitronectin, cytotactin, fibronectin, fibrinogen, laminin, matrix metalloproteinase-2, osteopontin, osteomodulin, prothrombin, thrombospondin and vWF. They recognize the sequence R-G-D in a wide array of ligands. In case of HIV-1 infection, the interaction with extracellular viral Tat protein seems to enhance angiogenesis in Kaposi's sarcoma lesions.
