Recombinant Anti-Human CCR4 Antibody

Cat. No.: **MOM-18187**

This product is for research use only and is not intended for diagnostic use.

Product Overview

Recombinant Humanized (from mouse) Antibody is against Human CCR4, expressed in Chinese Hamster Ovary cells(CHO)

Antigen Description

High affinity receptor for the C-C type chemokines CCL17/TARC and CCL22/MDC. The activity of this receptor is mediated by G(i) proteins which activate a phosphatidylinositol-calcium second messenger system. Can function as a chemoattractant homing receptor on circulating memory lymphocytes and as a coreceptor for some primary HIV-2 isolates. In the CNS, could mediate hippocampal-neuron survival.

Specific Activity

Tested positive against native antigen.
