

Product Information

Recombinant Anti-Human FAP Antibody scFv Fragment

Cat. No.: MOM-18211-S(P)

This product is for research use only and is not intended for diagnostic use.

Product Overview

Recombinant Humanized (from mouse) Antibody scFv Fragment is bind to Human FAP, expressed in E. coli

Antigen Description

In association with DPP4 is involved in the pericellular proteolysis of the extracellular matrix (ECM), the migration and invasion of endothelial cells into the ECM. May have a role in tissue remodeling during development and wound healing, and may contribute to invasiveness in malignant cancers.

Specific Activity

Tested positive against native antigen.

Target

FAP

Immunogen

A synthetic peptide derived from human Fibroblast activation protein, alpha.

Source

Humanized (from mouse)

Species Reactivity

Human

Type

scFv Fragment from Humanized (from mouse) IgG1 - kappa

Expression Host

E. coli

Purity

>95.0% as determined by Analysis by RP-HPLC & analysis by SDS-PAGE.

Applications

Suitable for use in ELISA, WB, Neut and most other immunological methods.

Storage

Store it under sterile conditions at -20°C upon receiving. Recommend to pack the protein into smaller quantities for optimal storage.

ANTIGEN GENE INFOMATION

Gene Name

FAP fibroblast activation protein, alpha [Homo sapiens]

Official Symbol

FAP

Synonyms

FAP; fibroblast activation protein, alpha; seprase; DPPIV; integral membrane serine protease; 170 kDa melanoma membrane-bound gelatinase; FAPA; DKFZp686G13158;

Gene ID

2191

mRNA Refseq

NM 004460

Protein Refseq

NP 004451

MIM

600403

UniProt ID

Q12884

Chromosome Location

2q23

Function

dipeptidyl-peptidase activity; endopeptidase activity; metalloendopeptidase activity; peptidase activity; protease binding; protein binding; protein dimerization activity; protein homodimerization activity; serine-type endopeptidase activity; serine-type peptidase activity; serine-type peptidase activity;
