

Product Information

Recombinant Anti-Human TNF Antibody

Cat. No.: **MOM-18254**

This product is for research use only and is not intended for diagnostic use.

Product Overview

Recombinant Human Antibody binds selectively to Human TNF, expressed in Chinese Hamster Ovary cells(CHO)

Antigen Description

Cytokine that binds to TNFRSF1A/TNFR1 and TNFRSF1B/TNFR. It is mainly secreted by macrophages and can induce cell death of certain tumor cell lines. It is potent pyrogen causing fever by direct action or by stimulation of interleukin-1 secretion and is implicated in the induction of cachexia, Under certain conditions it can stimulate cell proliferation and induce cell differentiation.
