

Product Information

Recombinant Anti-Human gnrhr Antibody

Cat. No.: **MOM-18371**

This product is for research use only and is not intended for diagnostic use.

Product Overview

Recombinant Mouse Antibody binds selectively to Human GNRHR, expressed in Chinese Hamster Ovary cells(CHO)

Antigen Description

Gonadotropin Releasing Hormone (GnRH) is down-regulated by hCG and believed to be an autocrine factor that regulates the ovary. The Gonadotropin Releasing Hormone Receptor (GnRHR) is synthesized in the pituitary gland. Activin A has been shown to stimulate the synthesis of GnRHR, illustrating a possible mechanism for the modulation of gonadotropin responsiveness to GnRH.

Specific Activity

Tested positive against native antigen.
