

Product Information

Recombinant Anti-Human grn Antibody Fab Fragment

Cat. No.: **MOM-18372-F(E)**

This product is for research use only and is not intended for diagnostic use.

Product Overview

Recombinant Mouse Antibody Fab Fragment is bind to Human GRN, expressed in Chinese Hamster Ovary cells(CHO)

Antigen Description

Granulins have possible cytokine-like activity. They may play a role in inflammation, wound repair, and tissue remodeling. Granulin-4 promotes proliferation of the epithelial cell line A431 in culture while granulin-3 acts as an antagonist to granulin-4, inhibiting the growth.

Specific Activity

Tested positive against native antigen.
