

Product Information

Recombinant Anti-Human hbegef Antibody

Cat. No.: **MOM-18374**

This product is for research use only and is not intended for diagnostic use.

Product Overview

Recombinant Mouse Antibody binds selectively to Human HBEGF, expressed in Chinese Hamster Ovary cells(CHO)

Antigen Description

May be involved in macrophage-mediated cellular proliferation. It is mitogenic for fibroblasts and smooth muscle but not endothelial cells. It is able to bind EGF receptors with higher affinity than EGF itself and is a far more potent mitogen for smooth muscle cells than EGF. Also acts as a diphtheria toxin receptor.

Specific Activity

Tested positive against native antigen.
