

Product Information

Recombinant Anti-Human il13ra1 Antibody

Cat. No.: **MOM-18574**

This product is for research use only and is not intended for diagnostic use.

Product Overview

Recombinant Mouse Antibody binds selectively to Human IL13RA1, expressed in Chinese Hamster Ovary cells(CHO)

Antigen Description

Binds with low affinity to interleukin-13 (IL13). Together with IL4RA can form a functional receptor for IL13. Also serves as an alternate accessory protein to the common cytokine receptor gamma chain for interleukin-4 (IL4) signaling, but cannot replace the function of IL2RG in allowing enhanced interleukin-2 (IL2) binding activity.

Specific Activity

Tested positive against native antigen.
