

Product Information

Recombinant Anti-Human IL17A Antibody

Cat. No.: **MOM-H08**

This product is for research use only and is not intended for diagnostic use.

Product Overview

Recombinant Humanized Antibody specifically binds to Human IL17A, expressed in HEK293

Antigen Description

The protein encoded by this gene is a proinflammatory cytokine produced by activated T cells. This cytokine regulates the activities of NF-kappaB and mitogen-activated protein kinases. This cytokine can stimulate the expression of IL6 and cyclooxygenase-2
