

Product Information

MemDX™ Membrane Protein Human MTDH (Metadherin) expressed in Sf9 for Antibody

Discovery

Cat. No.: **MP0079Q**

This product is for research use only and is not intended for diagnostic use.

This product is a 56.3 kDa Human MTDH membrane protein expressed in Sf9. The protein is for research use only and is not approved for use in humans or in clinical diagnosis.

Full Name

Metadherin

Introduction

Downregulates SLC1A2/EAAT2 promoter activity when expressed ectopically. Activates the nuclear factor kappa-B (NF-kappa-B) transcription factor. Promotes anchorage-independent growth of immortalized melanocytes and astrocytes which is a key component in tumor cell expansion. Promotes lung metastasis and also has an effect on bone and brain metastasis, possibly by enhancing the seeding of tumor cells to the target organ endothelium. Induces chemoresistance.
