

Product Information

MemDX™ Membrane Protein Human CXCR1 (C-X-C motif chemokine receptor 1) without tag for Antibody Discovery

Cat. No.: **MP0275X**

This product is for research use only and is not intended for diagnostic use.

This product is a 39.8 kDa Human CXCR1 membrane protein expressed in *in vitro* wheat germ expression system. The protein is for research use only and is not approved for use in humans or in clinical diagnosis.

Full Name

C-X-C motif chemokine receptor 1

Introduction

The protein encoded by this gene is a member of the G-protein-coupled receptor family. This protein is a receptor for interleukin 8 (IL8). It binds to IL8 with high affinity, and transduces the signal through a G-protein activated second messenger system. Knockout studies in mice suggested that this protein inhibits embryonic oligodendrocyte precursor migration in developing spinal cord. This gene, IL8RB, a gene encoding another high affinity IL8 receptor, as well as IL8RBP, a pseudogene of IL8RB, form a gene cluster in a region mapped to chromosome 2q33-q36
