

Product Information

MemDX™ Antibody Discovery - Mouse M-CSF R / CSF1R / CD115 (20-511) Membrane

Protein, Partial, -Avi -His tag, [Biotin]

Cat. No.: **MP0668F**

This product is for research use only and is not intended for diagnostic use.

This membrane protein is Mouse M-CSF R / CSF1R / CD115 (20-511). It has been tested in SDS-PAGE, ELISA. We provide this protein to facilitate your membrane protein antibody discovery and development.

Product Specifications

Host Species

Mouse

Target Protein

M-CSF R / CSF1R / CD115

Protein Length

ECD

Molecular Weight

The protein has a calculated MW of 58.4 kDa. The protein migrates as 78-115 kDa under reducing (R) condition (SDS-PAGE) due to glycosylation.

Sequence

AA Ala 20 - Ser 511 (Accession # P09581-1).

Product Description

Activity

Yes

Application

SDS-PAGE, ELISA

Expression Systems

HEK293

Tag

Avi tag at the C-terminus, followed by a His tag.

Protein Format

Soluble

Form

LYOPH

Reconstitution

Please see Certificate of Analysis for specific instructions.

Endotoxin

<1.0 EU/µg by the LAL method

Conjugation

Biotin

Purity

>95% as determined by SDS-PAGE.

Buffer

Lyophilized from 0.22 µm filtered solution in PBS, pH7.4 . Normally trehalose is added as protectant before lyophilization.

Storage

Stored at lyophilized form at -20°C or lower. Avoid repeated freeze-thaw cycles.

The antigen can be stable for 12 months in lyophilized form after storage at -20°C to -80°C, 3 months under sterile coditions after reconstitution after storage at -80°C.

Target

Target Protein

M-CSF R / CSF1R / CD115

Full Name

colony stimulating factor 1 receptor

Introduction

The protein encoded by this gene is the receptor for colony stimulating factor 1, a cytokine which controls the production, differentiation, and function of macrophages. This receptor mediates most if not all of the biological effects of this cytokine. Ligand binding activates the receptor kinase through a process of oligomerization and transphosphorylation. The encoded protein is a tyrosine kinase transmembrane receptor and member of the CSF1/PDGF receptor family of tyrosine-protein kinases. Mutations in this gene have been associated with a predisposition to myeloid malignancy. The first intron of this gene contains a transcriptionally inactive ribosomal protein L7 processed pseudogene oriented in the opposite direction. Alternative splicing results in multiple transcript variants. Expression of a splice variant from an LTR promoter has been found in Hodgkin lymphoma (HL), HL cell lines and anaplastic large cell lymphoma.

Alternative Names

Fm; Csf; Fim; Fms; CSF-; Fim-; Fim2; M-CS; CD115; Csfmr; Fim-2; CSF-1R; M-CSFR; M-CSF-R; AI323359; macrophage colony-stimulating factor 1 receptor; CSF-1 receptor; CSF-1-R; c-fms; proto-oncogene c-Fms; proto-oncogene fms
