

Product Information

MemDX™ Membrane Protein Human RTN4 (Reticulon 4) Full Length

Cat. No.: **MPC1357K**

This product is for research use only and is not intended for diagnostic use.

This product is a 129.9 kDa Human RTN4 membrane protein expressed in HEK293. The protein is for research use only and is not approved for use in humans or in clinical diagnosis.

RTN4

Full Name

Reticulon 4

Introduction

This gene belongs to the family of reticulon encoding genes. Reticulons are associated with the endoplasmic reticulum, and are involved in neuroendocrine secretion or in membrane trafficking in neuroendocrine cells. The product of this gene is a potent neurite outgrowth inhibitor which may also help block the regeneration of the central nervous system in higher vertebrates. Alternatively spliced transcript variants derived both from differential splicing and differential promoter usage and encoding different isoforms have been identified.
