

Product Information

MemDX™ Membrane Protein Human PTGIR (Prostaglandin I2 receptor) Full Length

Cat. No.: **MPC2464K**

This product is for research use only and is not intended for diagnostic use.

This product is a made-to-order Human PTGIR membrane protein expressed in Baculovirus/Insect expression system. The protein is for research use only and is not approved for use in humans or in clinical diagnosis.

Product Description

Expression Systems

Baculovirus/Insect expression system

Tag

Based on specific requirements

Protein Format

Detergent or based on specific requirements (Detergent, Liposome, Nanodisc, Polymer, VLP)

Form

Liquid

Storage

Aliquot and store at -20°C or lower. For long term storage, we recommend to store at -72°C or lower. Avoid freeze/thaw cycles.

Target**Target Protein**

PTGIR

Full Name

Prostaglandin I2 receptor

Introduction

The protein encoded by this gene is a member of the G-protein coupled receptor family 1 and has been shown to be a receptor for prostacyclin. Prostacyclin, the major product of cyclooxygenase in macrovascular endothelium, elicits a potent vasodilation and inhibition of platelet aggregation through binding to this receptor.

Alternative Names

PTGIR; IP; PRIPR; prostacyclin receptor; PGI receptor; PGI2 receptor; prostaglandin I2 (prostacyclin) receptor (IP); prostanoid IP receptor; Prostaglandin I2 receptor
