

Product Information

MemDX™ Membrane Protein Human OR5AS1 (Olfactory receptor family 5 subfamily AS member 1) Full Length

Cat. No.: **MPC3307K**

This product is for research use only and is not intended for diagnostic use.

This product is a made-to-order Human OR5AS1 membrane protein expressed in Baculovirus/Insect expression system. The protein is for research use only and is not approved for use in humans or in clinical diagnosis.

Full Name

Olfactory receptor family 5 subfamily AS member 1

Introduction

Olfactory receptors interact with odorant molecules in the nose, to initiate a neuronal response that triggers the perception of a smell. The olfactory receptor proteins are members of a large family of G-protein-coupled receptors (GPCR) arising from single coding-exon genes. Olfactory receptors share a 7-transmembrane domain structure with many neurotransmitter and hormone receptors and are responsible for the recognition and G protein-mediated transduction of odorant signals. The olfactory receptor gene family is the largest in the genome. The nomenclature assigned to the olfactory receptor genes and proteins for this organism is independent of other organisms.
