

Product Information

MemDX™ Membrane Protein Human OR5B12 (Olfactory receptor family 5 subfamily B member 12) Full Length

Cat. No.: **MPC3308K**

This product is for research use only and is not intended for diagnostic use.

This product is a made-to-order Human OR5B12 membrane protein expressed in Baculovirus/Insect expression system. The protein is for research use only and is not approved for use in humans or in clinical diagnosis.

Product Description

Expression Systems

Baculovirus/Insect expression system

Tag

Based on specific requirements

Protein Format

Detergent or based on specific requirements (Detergent, Liposome, Nanodisc, Polymer, VLP)

Form

Liquid

Storage

Aliquot and store at -20°C or lower. For long term storage, we recommend to store at -72°C or lower. Avoid freeze/thaw cycles.

Target**Target Protein**

OR5B12

Full Name

Olfactory receptor family 5 subfamily B member 12

Introduction

Olfactory receptors interact with odorant molecules in the nose, to initiate a neuronal response that triggers the perception of a smell. The olfactory receptor proteins are members of a large family of G-protein-coupled receptors (GPCR) arising from single coding-exon genes. Olfactory receptors share a 7-transmembrane domain structure with many neurotransmitter and hormone receptors and are responsible for the recognition and G protein-mediated transduction of odorant signals. The olfactory receptor gene family is the largest in the genome. The nomenclature assigned to the olfactory receptor genes and proteins for this organism is independent of other organisms.

Alternative Names

OR5B12; OR5B16; OST743; OR5B12P; OR11-241; olfactory receptor 5B12; olfactory receptor 5B16; olfactory receptor OR11-241; olfactory receptor, family 5, subfamily B, member 12 pseudogene; olfactory receptor, family 5, subfamily B, member 16; Olfactory receptor family 5 subfamily B member 12
