Product Information

MemDX™ Membrane Protein Human OR51B2 (Olfactory receptor family 51 subfamily B member 2) Full Length

Cat. No.: **MPC3352K**
This product is for research use only and is not intended for diagnostic use.

This product is a made-to-order Human OR51B2 membrane protein expressed in Baculovirus/Insect expression system. The protein is for research use only and is not approved for use in humans or in clinical diagnosis.

Product Specifications

Host Species
Human

Target Protein
OR51B2

Product Description

Expression Systems
Baculovirus/Insect expression system

Tag
Based on specific requirements

Protein Format
Detergent or based on specific requirements (Detergent, Liposome, Nanodisc, Polymer, VLP)

© Creative Biolabs All Rights Reserved

Form

Liquid

Storage

Aliquot and store at -20°C or lower. For long term storage, we recommend to store at -72°C or lower. Avoid freeze/thaw cycles.

Target

Target Protein

OR51B2

Full Name

Olfactory receptor family 51 subfamily B member 2

Introduction

Olfactory receptors interact with odorant molecules in the nose, to initiate a neuronal response that triggers the perception of a smell. The olfactory receptor proteins are members of a large family of G-protein-coupled receptors (GPCR) arising from single coding-exon genes. Olfactory receptors share a 7-transmembrane domain structure with many neurotransmitter and hormone receptors and are responsible for the recognition and G protein-mediated transduction of odorant signals. The olfactory receptor gene family is the largest in the genome. The nomenclature assigned to the olfactory receptor genes and proteins for this organism is independent of other organisms. This olfactory receptor gene is a segregating pseudogene, where some individuals have an allele that encodes a functional olfactory receptor, while other individuals have an allele encoding a protein that is predicted to be non-functional.

Alternative Names

OR51B2; OR51B1P; HOR5'Beta3; olfactory receptor 51B2; odorant receptor HOR5'beta3; olfactory receptor 51B1; Olfactory receptor family 51 subfamily B member 2

Gene ID

79345

UniProt ID

Q9Y5P1
