

Product Information

MemDX™ Membrane Protein Human CD80 (CD80 molecule) Full Length

Cat. No.: **MPC3380K**

This product is for research use only and is not intended for diagnostic use.

This product is a made-to-order Human CD80 membrane protein expressed in HEK293. The protein is for research use only and is not approved for use in humans or in clinical diagnosis.

Target Protein

CD80

Full Name

CD80 molecule

Introduction

The protein encoded by this gene is a membrane receptor that is activated by the binding of CD28 or CTLA-4. The activated protein induces T-cell proliferation and cytokine production. This protein can act as a receptor for adenovirus subgroup B and may play a role in lupus neuropathy.
