

Product Information

MemDX™ Membrane Protein Human ST3GAL2 (ST3 beta-galactoside alpha-2,3-sialyltransferase 2) Full Length

Cat. No.: **MPC4149K**

This product is for research use only and is not intended for diagnostic use.

This product is a made-to-order Human ST3GAL2 membrane protein expressed in HEK293. The protein is for research use only and is not approved for use in humans or in clinical diagnosis.

Full Name

ST3 beta-galactoside alpha-2,3-sialyltransferase 2

Introduction

The protein encoded by this gene is a type II membrane protein that catalyzes the transfer of sialic acid from CMP-sialic acid to galactose-containing substrates. The encoded protein is normally found in the Golgi but can be proteolytically processed to a soluble form. This protein, which is a member of glycosyltransferase family 29, can use the same acceptor substrates as does sialyltransferase 4A.
