

Product Information

MemDX™ Membrane Protein Human PTGFR (Prostaglandin F receptor) Expressed in Wheat germ, Full Length

Cat. No.: **MPX0006K**

This product is for research use only and is not intended for diagnostic use.

This product is a 58 kDa Human PTGFR membrane protein expressed in Wheat germ. The protein is for research use only and is not approved for use in humans or in clinical diagnosis.

Product Specifications

Host Species

Human

Target Protein

Product Description

Expression Systems

Wheat germ

Tag

GST tag at N-Terminus

Protein Format

Soluble

Form

Liquid

Endotoxin

<0.1 EU/μg by the LAL method

Buffer

pH: 8.00, Constituents: 0.31% Glutathione, 0.79% Tris HCl

Storage

Aliquot and store at -20°C or lower. For long term storage, we recommend to store at -70°C or lower. Avoid freeze/thaw cycles.

Target**Target Protein**

PTGFR

Full Name

Prostaglandin F receptor

Introduction

The protein encoded by this gene is member of the G-protein coupled receptor family. This protein is a receptor for prostaglandin F2-alpha (PGF2-alpha), which is known to be a potent luteolytic agent, and may also be involved in modulating intraocular pressure and smooth muscle contraction in uterus. Knockout studies in mice suggest that the interaction of PGF2-alpha with this receptor may initiate parturition in ovarian luteal cells and thus induce luteolysis. Two transcript variants encoding different isoforms have been found for this gene.

Alternative Names

FP; prostaglandin F2-alpha receptor; FP prostanoid receptor; PGF receptor; PGF2 alpha receptor; prostaglandin receptor (2-alpha); prostanoid FP receptor; PTGFR; Prostaglandin F receptor
