Handling Notes

Frozen cells should be thawed immediately upon receipt and grown according to handling procedure to ensure cell viability and proper assay performance.

Note: Do not freeze the cells upon receipt as it may result in irreversible damage to the cell line.

Disclaimer: We cannot guarantee cell viability if the cells are not thawed immediately upon receipt and grown according to handling procedure.

Incubation

37°C with 5% CO₂

Applications

Drug screening and biological assays

Application Notes

Cells were plated in a 384-well plate and incubated overnight at 37°C and 5% CO₂ to allow the cells to attach and grow. Cells were then stimulated with a control for high-throughput drugs screening and functional assays.

Full Name

Tumor necrosis factor receptor superfamily, member 18

Introduction

Predicted to enable tumor necrosis factor-activated receptor activity. Involved in positive regulation of cell adhesion. Located in external side of plasma membrane. Is expressed in genitourinary system; gut; heart ventricle; lung; and skin. Orthologous to human TNFRSF18 (TNF receptor superfamily member 18).

Alternative Names
