

Product Information

MemDX™ Human CD276 CHO-S Cell Line

Cat. No.: **S01YF-0424-KX26**

This product is for research use only and is not intended for diagnostic use.

Product Information

Target Protein

CD276

Target Protein Species

Human

Host Cell Type

CHO-S

Target Classification

Immune Checkpoint

Target Family

Immune Checkpoint

Target Research Area

Immunology Research

Related Diseases

Immunodeficiency; Neuroblastoma

Product Properties

Morphology

Suspension

Assay Types

Functional assay

Mycoplasma Testing

Negative

Biosafety Level

Level 1

Activity

Yes

Quantity

3x10⁶ cells

Form

Frozen cells

Selective Antibiotic(s)

Regular antibiotics active against mycoplasmas, bacteria and fungi.

Handling Notes

Frozen cells should be thawed immediately upon receipt and grown according to handling procedure to ensure cell viability and proper assay performance.

Note: Do not freeze the cells upon receipt as it may result in irreversible damage to the cell line.

Disclaimer: We cannot guarantee cell viability if the cells are not thawed immediately upon receipt and grown according to handling procedure.

Incubation

37°C with 5% CO₂

Applications

Drug screening and biological assays

Application Notes

Cells were plated in a 384-well plate and incubated overnight at 37°C and 5% CO₂ to allow the cells to attach and grow. Cells were then stimulated with a control for high-throughput drugs screening and functional assays.

Use Restrictions

These cells are distributed for research use only.

Shipping

Dry ice

Storage

Liquid nitrogen

Target

Full Name

CD276 molecule

Introduction

The protein encoded by this gene belongs to the immunoglobulin superfamily, and thought to participate in the regulation of T-cell-mediated immune response. Studies show that while the transcript of this gene is ubiquitously expressed in normal tissues and solid tumors, the protein is preferentially expressed only in tumor tissues. Additionally, it was observed that the 3' UTR of this transcript contains a target site for miR29 microRNA, and there is an inverse correlation between the expression of this protein and miR29 levels, suggesting regulation of expression of this gene product by miR29. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.

Alternative Names

CD276; B7H3; B7-H3; B7RP-2; 4Ig-B7-H3; CD276 antigen; B7 homolog 3; costimulatory molecule; CD276 molecule
